DETAILED ACTION

1. Claims 1-11 have been examined.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 USC 103(a) as unpatentable over Dubner(US Pat. No:6.564,190) in view of Michaud(US Pat. No:6,003,018).
4. As per claims 1-11 Dubner teaches a rule-based decision process for formulating an investment strategy in debt and equity with a variety of businesses(Abstract)(Figs 1-5)(col 1 line 45-col 2 line 40) as well as analyzing market research data in terms of risk and return and determining trends(Fig 1/110) and graphically represents the values on a risk return matrix(Fig 1)(Fig 2).Michaud also teaches graphical representations of risk/return in coordinate systems with trends and value changes(Fig 3) as well as a composition diagram in rectilinear form for debt/equity compositions for both short and long term over the horizon(Fig 4) and a graphical depiction of reward and risk(Fig 5) with trends in value(Fig 5) to form a risk/reward decision rule matrix(col 3 lines 54-56).Michaud teaches a method of evaluating an existing portfolio consisting of a plurality of assets which may be a projects in a business,etc(Abstracts)(col 1 line

Art Unit: 3624

15-col 21 line 25)(col 3 line 39-col 4 line 8).Michaud also teaches use of a differentstorage capabilities in implementation(col 6 lines 17-52). It would have been obvious to one skilled in the art at the time of the invention to combine Dubner in view of Michaid to teach the applicant's disclosure. The motivation to combine is to teach a business strategy for minimizing the instability of solutions as enunciated by Michaud(col 2 lines 9-11).

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claim 11 is further rejected under 325 USC 101 for failing to provide a concrete,useful and tangible output.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-11 are also rejected under 35 USC 112(2nd) for failing to define in precise terms what the applicant regards is the invention. The claims are too broad to discern any novelty vis a vis the existing art.
